MAGNETO *Service* INFORMATION

Bulletin FM282

IMPORTANT NOTICE

Application of
FM-XD1B7S and FM-XDE1B7S Magnetos

These units are provided with a special impulse coupling having a 13° lag angle and a spring loaded coupling set to throw out at 400-500 RPM.

The FM-XD1B7S and FM-XDE1B7S magnetos will replace the FM-XD1B7 and FM-XDE1B7P magnetos and can be used on Wisconsin Motor engines Models ACN and BKN having the spark plugs in a vertical position. The FM-XD1B7 and FM-XDE1B7P magnetos must be used on engine Models ACN and BKN that have the spark plug in the offset position and on all engine Models ABN and AKN.
