CATALOG GUIDE KEYS & USAGE

The items in this catalog reference replacement units available for many vehicle applications using import manufactured alternators, generators, and starters. An explanation of the numbering systems appear below:

PREFIX: CA - Alternator Assembly CG - Generator Assembly CM - Starter Assembly

BASE NUMBER: Lester number used for reference and ease of product identification.

SUFFIX: M - Where used. This indicates a modified unit e.g. conventional type starter versus gear reduction.

POP. CODE: We have denoted a popularity code for stocking purposes. "A" being the most popular and "D" the least. This may vary depending on geographic location. "N" numbers are later model applications that have recently become available.

MFG: The manufacturers column indicates what will normally be supplied as replacement. Substitution may be found and is noted for reference only.

YR/MODEL: Indicates the general years and model the unit is used on. For specific application and model vehicle identification the Lester catalogs should be referenced.

All numbers and information in this catalog are for reference purposes only.
