WABASH 76
WADE & SONS 76
WAI (WHETHER HILL) 76-81

EXPLANATION OF FOOTNOTES

O.E.M. REFERENCE TO ACE ARMATURE AND ROTOR PARTS

Original equipment manufacturers normally do not publish part numbers for armature components. The best reference available is the assembly number. Therefore, Ace has coded the O.E.M. armature and rotor numbers with suffixes that refer to specific components.

Example (Under Delco):

DEL No.	ACE No.	
1932872	83049	(No Suffix = Complete armature)
1932872-1	SS-63	(-1 Suffix = Shaft 1932872 armature)
1932872-2	C-141	(-2 Suffix = Commutator for 1932872 armature)

Suffix Codes:

-1	Shaft	-6	Armature coil
-2	Commutator/slip ring	-7	Rotor bobbin
-3	Slot insulator	-8	Rotor coil
-4	End fiber	-9	Rotor core
-5	Lamination	-10	Collar

-K SUFFIX KITS FOR BUILDING COMPLETE ASSEMBLIES

For some starters and alternators Ace offers unassembled kits. Most of these kits contain all the components for building complete units. Others may be minus designated components. When an O.E.M. starter or alternator number is followed by -K, the Ace number in the cross reference is a kit.
