

Weekend Concludes with Valuable APRA Clinic

Global Connection columnist Mohammad Samii will be a featured speaker at the Automotive Parts Rebuilders Association Electrical Clinic, Sunday, March 26 in Charlotte, N.C. This informative seminar will bring rebuilders up to date on what is happening in the field and how things work.

Samii combines his experience with a lot of OE-obtained training to cover a wide range of topics from basics of operation to advanced principles of PCM control, and monitoring of charging and starting systems. This clinic is designed to help rebuilders in both understanding how certain things work, and also avoiding warranty returns by building units that work properly and interface correctly on the vehicle.

Exchange columnist Greg Neuenfeldt of Dow Corning Corporation will also be a featured speaker.

This clinic will follow the Thursday through Saturday Electrical Rebuilder's Association event, which includes training, tours, and a day-long exhibition. See page 6 for more details.
