# MAGNETO *Service* INFORMATION

## IDENTIFICATION OF MAGNETIC ROTORS

All rotors for FM-J and FM-X magnetos are identified in our repair price list by the numbers 2480 with the prefix AX, BX, etc., for example, AX2480 and BX2480.

We are now casting the identification letters, but not the 2480, in the cam end of the die casting as shown on the above drawing.

A complete list of rotors and the magnetos in which they are used is shown on page 4 of Repair Price List 9837J.
