BEARING SUPPORT REPLACEMENT KITS

For FM-4 and O4, FM-H4 and OH4, FM-6 and H6, FM-R4 and OR4, FM-R6 and OR6, FM-XR4 and XOR4, FM-XR6 and XOR6, E6A and E6B Magnetos

Fairbanks, Morse & Co. announces the availability of a new bearing support and distributor shaft gear assembly incorporating distributor shaft needle bearings. This assembly, packed in kit form, has been developed to provide easy field replacement, increase bearing life and reduce maintenance.

Field replacement is quick and easy. Remove end cap and old bearing support assembly. Install new bearing support which is shipped assembled. Be sure the timing gears are properly meshed. Reassemble the end cap to magneto frame using new end cap to frame gasket.

Order your supply of these kits today. Complete kits are priced lower than the cost of the individual parts when purchased separately. Prices are list, subject to change without notice.
